• HYBRID PEARL MILLET

SUGAR GRAZE II

COTUGRAZE

XTRAGRAZE

FORAGE SORGHUM SEEDS - Cotugraze

Features and Benefits

- bmr 6 low lignin technology, for improved digestibility & feeding efficiency
- A traditional style sorghum sudangrass growth habit, with value added bmr 6 gene technology
- Extremely high leaf to stem ratio that is shade tolerant on the lower canopy
- Exceptional seedling vigor, for rapid stand establishment and early growth
- High sugar content, to improve palatability and feed intake
- Feed lot equivalent rates of gain in animals direct grazing XtraGraze bmr
- Versatile, fits many production schemes
- Superior regrowth, for multiple harvests
- Excellent nitrogen use efficiency, to manage input costs
- Stay green trait, for improved leaf retention and superior forage analysis
- Enhanced drought tolerance, for top production in low water environments
- Wide adaptation, can be used in many soil types and production environments

Agronomic Information

Life Cycle: Annual

Ease of Establishment: Excellent

Drought Stress tolerance: Excellent

Wet Soil: Fair

Low pH Tolerance: Moderate

Minimum pH: 6.0

Seed color: White

Seed/lb 14,500 approx

Seedling vigor: Excellent

Maturity: 10-12 days later than

conventional sorghum sudan hybrids

Seeding rate 25 -35 lbs. per acre

Height: 8-10 feet

Plant color : Tan

Midrib color : Brown (bmr 6)

Photoperiod sensitivity: Insensitive

News

Mr.Ghariani Adel is going to present EV Company during the international congress ISF.
